Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-4 are in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 2, there is no proper antecedent for “the vertical rear wall”; and in line 4, there is no proper antecedent for “the container”. In claim 3, line 1, the recitation “wherein the first and fasteners” appears to be incomplete.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Johnson.

Johnson discloses a shade system including a first and second fasteners 72, 74 and a shade member of a flexible material which provides shade for a horizontal platform. The shade member includes weight 48 in a cylindrical configuration.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson.

The size of the shade member is deemed to have been an obvious matter of design choice to one skilled in the art dependent on particular applications.

8. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnes in view of Johnson.

Barnes discloses a cover to be used over the swim platform of a boat generally as claimed. The cover of Barnes does not use the same type of connectors as claimed, nor the use of a weighted portion at the lower portion of the cover. Johnson discloses a shade cover used on a boat and teaches the use of Velcro connectors to secure the cover to the boat and the use of a weighted lower end. In view of these disclosures, it would have been obvious to one skilled in the art to secure the cover of Barnes to the vertical surface of the boat by the use of Velcro connectors and to provide the lower edge of the cover with a weighted member, generally as taught by Johnson. The use of Velcro connectors would have been desirable to facilitate the connection of the cover. The use of a weighted lower would have been desirable to force the cover to remain in place, generally as taught by Johnson.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knudson discloses a stern mounted container. Shaw, III discloses a shroud located on the stern of a boat.
